EDUCATION

Virtual University of Pakistan

Bachelor of Science in Computer Science (BSCS)

August 2021 - September 2025

- **Key Courses:** Data Structures & Algorithms, Database Systems, Web Programming, OOP

PROJECTS

Wellness360 Health Tracker – Full-Stack Project [🔗](#)

- Developed a secure REST API for user authentication, health data logging, and CRUD operations.
- Built an interactive dashboard using D3.js, HTML/CSS, and JavaScript.
- Optimized SQL queries and indexing, improving performance by 30%
- Deployed on Heroku and implemented Git-based CI/CD workflows.

URL Shortener API – REST API Project [🔗](#)

- Created a URL shortening API with redirection, CRUD endpoints, and unique key generation.
- Added validation, error handling, and API usage logging.
- Built a minimalist frontend using HTML, CSS, and JavaScript.
- Documented API endpoints and maintained version control using Git/GitHub.

SKILLS

- **Languages:** Python (Intermediate), SQL (Intermediate), HTML/CSS (Intermediate), JavaScript(basic)
- **Frameworks & Tools:** Flask, Git, GitHub, Postman, VS Code
- **Concepts:** REST APIs, OOP, Database Design, API Testing, Debugging
